PROFESSIONAL SUMMARY

Master of Information Technology student at RMIT University with 3+ years of experience in full-stack and microservices development at SAP. Strong expertise in AI/ML, NLP, Generative AI, and backend engineering. Experienced in building AI systems including LLM agents, knowledge graphs, and data pipelines.

SKILLS

AI / ML: Natural Language Processing (NLP), Generative AI, LLM Agents, Knowledge Graphs, Machine Learning, Deep Learning, Data Analysis, Hypothesis Testing

Programming: Python, Java, SQL, JavaScript

Frameworks: FastAPI, Spring Boot, LangChain

AI Tools: Gemini API, OpenAI API, NLTK, Scikit-learn

Data Tools: NumPy, Pandas, Matplotlib, Tableau

Databases: PostgreSQL, SQLite, Neo4j

DevOps & Tools: Docker, GitHub, Jenkins, CI/CD

Concepts: REST APIs, Microservices, OAuth2/JWT Security, Agile/Scrum

WORK EXPERIENCE

Associate Software Developer – SAP Labs | Bengaluru, India | Jun 2023 – Feb-2026

• Led Agile ceremonies as Scrum Master improving team collaboration and sprint efficiency.

• Built and deployed secure RESTful APIs using Java and Spring Boot in a microservices architecture.

• Implemented API authentication and authorization using OAuth2/JWT.

• Improved performance of a core microservice module by redesigning architecture and optimizing service communication.

• Mentored junior developers on testing practices using JUnit and Mockito.

Associate Software Developer Intern – SAP Labs | Bengaluru, India | Feb 2023 – Jun 2023

• Developed automated check tools to support migration from monolithic architecture to microservices.

• Implemented unit and integration tests improving code reliability and maintainability.

EDUCATION

Master of Information Technology – RMIT University | Melbourne, Australia | 2026 – 2028

Bachelor of Technology, Computer & Communication Engineering – Manipal Institute of Technology | India | 2019 – 2023

AI & DATA PROJECTS

Knowledge Graph Builder from Research Papers (LLM + Neo4j)

• Built an end-to-end AI pipeline to automatically construct knowledge graphs from research papers for semantic search and natural language querying

• Implemented NER-assisted extraction and stored graph structures in Neo4j.

Browser AI Agent (Chrome Extension)

• Developed a Google Chrome Extension chatbot leveraging FastAPI and Gemini LLM to create an intelligent browser agent.

• Implemented functionalities for summarizing web pages, answering user questions based on current page content, and extracting insights from YouTube videos.

• Currently enhancing capabilities to achieve full agentic and autonomous behavior

Language Detection Model

• Built a machine learning model to detect language of text with ~99% accuracy using NLTK and Scikit-learn.

• Compared Linear SVM, Naive Bayes, and Logistic Regression algorithms.

Premier League Performance Dashboard (2000–2020)

• Web scraped historical data using BeautifulSoup and analyzed with Pandas and NumPy.

• Built Tableau dashboards to visualize performance of top Premier League football clubs.

Customer Segmentation (Machine Learning)

• Implemented K-Means clustering to segment customers based on behavioral features.

• Performed EDA and visualization using Pandas and Matplotlib.

Stock Index Database

• Built a data pipeline that scrapes stock index data using BeautifulSoup and stores it in SQLite.

INTERESTS

Public Speaking, Football, Basketball, Music (Guitar & Piano)
